Artist Bio

Hitesh Vaidya is a visual artist based in Bhaktapur with interest in the visual and communicative potential of the objects and space working without the limitation of medium to convey ideas. He is also a founding member of Aakrit Collective a young contemporary art collective based in Bhaktapur.

Vaidya believes that human experiences are encapsulated in the things we use and the space we live in. It works as reference in the process of remembrance, can evoke emotion and aid in identity formation for individuals, families and communities. They act as visual signifiers and commentaries on our social and cultural histories. His work questions the idea of where we belong and what belongs to us. Drawn for the personal experience he intends to touch the communal memory of the people. His practice as a medium includes from painting to painterly intervention into existing objects and working among still and moving images.
